PROFESSIONAL SUMMARY

IT and Cloud Operations professional with over four years of experience supporting enterprise systems, cloud platforms, and video/voice communication environments. Strong background in incident management, production support, troubleshooting, and service optimization within ITIL and Agile frameworks. Experienced in working with cross-functional global teams, monitoring tools, and cloud technologies. Open to opportunities in IT Operations, Production Support, Cloud Support, Technical Analyst, or Infrastructure Support roles.

CORE TECHNICAL SKILLS

Operating Systems & Platforms
Windows, Linux, Microsoft Azure, AWS, Cisco CUCM, Microsoft Teams

IT Service Management & Tools

ServiceNow, Jira, Confluence, Incident Management, Change Management, Problem Management, SLA Monitoring, ITIL Processes

Monitoring & Analytics

SolarWinds, New Relic (basic), Kibana, Adobe Analytics (familiarity), Performance Monitoring, Telemetry Dashboards

Video, Voice & Media Technologies
Enterprise Voice Systems, Video Conferencing, Streaming Environments, A/V Systems, Transcoding Fundamentals, Content Delivery Troubleshooting

Programming & Data
Python (automation, diagnostics, data processing), SQL (queries, reporting), Data Analysis, Automation Scripts

Reporting & Visualization
Power BI, Microsoft Excel (advanced), PowerPoint, KPI Reporting, Trend Analysis

Methodologies
ITIL, Agile Scrum, Incident Response, Root Cause Analysis (RCA), Change Advisory Board (CAB)

Soft Skills
Clear Communication, Stakeholder Collaboration, Accountability, Documentation, Continuous Improvement

---

PROFESSIONAL EXPERIENCE

Technical Consultant – IT & Cloud Operations

Orange Business Services
January 2019 – November 2022

- Provided Level 2 technical support for enterprise cloud, network, voice, and collaboration environments supporting international clients.
- Managed incidents, major incidents, problems, and changes in accordance with ITIL best practices while meeting SLA and uptime requirements.
- Used ServiceNow to log, track, prioritize, and escalate incidents, coordinating with Level 3 engineers and external vendors.
- Performed root-cause analysis for recurring issues across voice, video, and collaboration platforms including Cisco CUCM and Microsoft Teams.
- Monitored infrastructure performance using SolarWinds and telemetry dashboards to proactively identify and resolve anomalies.
- Participated in Change Advisory Board (CAB) meetings and documented configuration items, known errors, and workarounds.
- Supported cloud migration and hybrid infrastructure initiatives in collaboration with global engineering teams.
- Recognized for optimizing escalation workflows, contributing to a **20% reduction in mean time to resolution (MTTR)**.

AI Analysis Intern (Co-op)

Semper 8
September 2024 – December 2024

- Conducted data analysis and machine-learning-based sentiment detection to support business insights and reporting.
- Used Python and SQL to clean, process, and analyse structured and unstructured datasets.
- Built data visualizations and reports to communicate findings to technical and non-technical stakeholders.
- Worked in Agile sprint cycles, tracking tasks and progress using Jira and Confluence.

ACADEMIC & TECHNICAL PROJECTS

Cloud & AI Projects

George Brown College — Toronto, ON
2023 – 2025

- **Sign Language Recognition (AI Project):** Developed a CNN-based model for real-time gesture recognition and translation.
- **Financial News Sentiment Analysis (Data Project):** Built an NLP-based sentiment classifier to analyse market and investor sentiment.
- **Cloud Deployment Project:** Deployed a containerized web application using AWS and Kubernetes, improving scalability and fault tolerance.

EDUCATION

George Brown College — Toronto, ON
Postgraduate Diploma, **Artificial Intelligence** | 2025
Postgraduate Diploma, **Cloud Computing** | 2023

Rajiv Gandhi Institute of Technology — Mumbai, India
Bachelor of Engineering, **Electronics & Telecommunications** | 2018

CERTIFICATIONS

- **Microsoft Certified: Azure Fundamentals (AZ-900)**
- **AWS Certified Cloud Practitioner** — In Progress
- **MuleSoft Developer Certification** — In Progress

ADDITIONAL SKILLS & ACTIVITIES

- Quality control testing and monitoring of live video content for operational consistency.
- Participation in workshops related to IoT, Robotics, and Mobile Systems.
- Former IETE Official Photographer, contributing to technical event documentation and media coverage.
